

SECTION 1: SUBSTANCE IDENTIFICATION AND COMPANY INFORMATION.

1.1 PRODUCT IDENTIFICATION

PRODUCT NAME:	NEOSAN LABS RESTORATION COMBINED FOR USE.
BRAND:	NEOSAN LABS RESTORATION PART A COMBINED WITH PART B.
DESCRIPTION:	Biodegradable mixture of cationic surfactants, non-ionic surfactants, hydrogen peroxide, water and inert ingredients.
NAME OF THE SUBSTANCE 1:	Compound of quaternary ammonium ion compounds, alkyl dimethyl benzyl chloride (50% C14, 40% C12, 10% C16) ammonium
CAS NUMBER:	68424-85-1
NAME OF SUBSTANCE 2:	Hydrogen Peroxide
CAS NUMBER	7722-84-1

1.2 IDENTIFIED RELEVANT USES OF THE SUBSTANCE OR MIXTURE AND INADVISABLE USES

IDENTIFIED RELEVANT USES OF THE SUBSTANCE	<p>Product used: NEOSAN LABS RESTORATION PART A (50%) combined with NEOSAN LABS RESTORATION PART B (50%) for its application; mix done by the applicator in a fogging or spraying device.</p> <p>The product is designed specifically as a general cleaner and Restoration for use in homes, hospitals, and commercial facilities. It is formulated to disinfect hard, non-porous, inanimate environmental surfaces such as floors, walls, metal surfaces, stainless steel, porcelain, glazed ceramic tile, plastic surfaces, bathrooms, shower stalls, bathtubs, hard nonporous cabinets, and walls of swimming pools. May be used in the kitchen on non-food contact surfaces. If used on food contact surfaces, rinse with potable water prior to food contact. In addition, this product deodorizes areas that are hard to keep fresh smelling including garbage cans, basements, restrooms and areas prone to odors caused by microorganisms.</p> <p>For a complete list of applications, see section 16</p>
--	---

1.3 PROVIDER OF THE SAFETY DATA SHEET

PROVIDER:	<p>NEOSAN LABS Inc. 609 Broadway Blvd NE ALBUQUERQUE, NEW MEXICO 87102 USA contact@neosanlabs.com</p>
------------------	--

1.4 EMERGENCY TELEPHONE

	<p>Information updated of the product's composition has been sent to the Toxicology Information Service (National Institute of Toxicology and Forensic Sciences).</p> <p>In case of poisoning, call Toxicology Information Service</p>
POISON CENTER	<p>+1 800-222-1222 24 h/365 days</p>

SECTION 2: HAZARDS IDENTIFICATION.

Under conditions of intended use this product is not considered hazardous and does not pose a risk to health.

NFPA USA CODES	HEALTH: 1 / FLAMMABILITY: 0 / REACTIVITY: 0
HMIS CODES	HEALTH: 1 / FLAMMABILITY: 0 / REACTIVITY: 0 / PPE: A

SECTION 3: COMPOUND/INFORMATION ABOUT COMPOUNDS		
CAS Number	Identification name	Content mass% (or grams)
68424-85-1	Compound of quaternary ammonium ion compounds, alkyl dimethyl benzyl chloride (50% C14, 40% C12, 10% C16) ammonium.	1.5 – 2.5 % (m/m)
7722-84-1	Hydrogen peroxide	3 - 4% (m/m)
<p>NEOSAN LABS RESTORATION COMBINED FOR USE: Biodegradable mixture of cationic, non-ionic surfactants hydrogen peroxide, and inert ingredients. 1.5 – 2.5% of the quaternary ammonium ion compounds, chlorides, alkyl dimethyl benzyl ammonium, 3 - 4% of hydrogen peroxide, and 95.5 – 93.5% inert ingredients.</p>		

SECTION 4: FIRST AID MEASURES	
IN CASE OF EYE CONTACT:	Flush cautiously with running water for a period of between 15 and 20 minutes. Remove contact lenses, if they are easy to remove. Continue rinsing. If eye irritation persists, consult a Physician.
IN CASE OF SKIN CONTACT:	Take off contaminated clothing and wash before reuse. Wash immediately and abundantly for a period of between 15 and 20 minutes. If skin irritation persists, consult a Physician.
IF INHALED:	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call the TOXICOLOGY INFORMATION SERVICE or a Physician if feeling unwell.
IN CASE OF INGESTION:	Call the TOXICOLOGY INFORMATION SERVICE or a Physician if feeling unwell. Needs specific measures. If victim is able to swallow, give water or milk quickly. DO NOT induce vomiting unless instructed to do so from the toxicology service or a doctor. Do not introduce anything in the mouth to an unconscious person. Use of gastric lavage may be contraindicated because of the high probability of mucosal lesions.

SECTION 5: FIRE FIGHTING MEASURES		
Material is not flammable or combustible.		
5.1 EXTINGUISHING MEASURES		
Same as those used for surrounding fire.		
5.2 SPECIFIC HAZARDS FROM THE SUBSTANCE OR MIXTURE:		
Non-flammable substance. No unusual risks of fire and explosion. In case of fire, the thermal decomposition may give off nitrous oxides and ammoniac vapours and carbon dioxide during the fire.		
5.3 PERSONAL RECOMMENDATIONS FOR FIRE FIGHTING:		
Date of Document: 03/2021	SECURITY DATA SHEET 2021/USA	Page 2 of 8

There is no special procedure for firefighting.

SECTION 6: MEASURES IN CASE OF ACCIDENTAL RELEASE

6.1 PERSONAL PRECAUTIONS, EQUIPMENT PROTECTION AND EMERGENCY PROCEDURES:

Avoid contact with skin and eyes. Wear protection glasses (face shield or safety glasses).
Wear protective clothing and gloves resistant to chemicals (butyl rubber, nitrile and neoprene, polyethylene; polyvinyl chloride).
Consult the advice in section 8.

6.2 PRECAUTIONS RELATIVE TO THE ENVIRONMENT

Do not discharge waste into drains or watercourses. Dispose of waste according to local regulations. Throw away clothing and other absorbent materials that have been impregnated or strongly contaminated by the product, adequately according to local regulations.

6.3 METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING

Contain spillage, flush with large amount of water. Avoid large discharges; sorbents may be used. Create dams with sand or land to contain the spill.

SECTION 7: HANDLING AND STORAGE

7.1 PRECAUTIONS FOR SAFE HANDLING

RECOMMENDATIONS OF GENERAL MEASURES OF HYGIENE AT WORK	Do not eat, drink nor smoke while using the product. Wash hands with soap and water thoroughly after handling. For cleaning and maintenance of protective clothing, use detergent and hot water. Keep and wash protective clothing separately from other laundry. Use in a well-ventilated area.
--	---

7.2 CONDITIONS FOR SAFE STORAGE, INCLUDING ANY POSSIBLE INCOMPATIBILITIES

Keep away from food and beverages, including those for animals.
Store in a dry place. Store away from heat sources and direct sunlight. The storage temperature can be between - 21°F / -6°C and +71°C / +160°F. The optimum storage temperature is between 50° F / 10° C and 119° F / 48° C.
Keep out of anionic materials, heavy metal ions, alkaline and combustible materials.
In case of fire, do not breathe smoke.

SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1 CONTROL PARAMETERS

PART A- SUBSTANCES: The data of this substances are not available: quaternary ammonium ion compounds, alkyl dimethyl benzyl chloride (50% C14, 40% C12, 10% C16) ammonium (CAS Number: 68424-85-1)
TLV Limit in Air / TVL 8 hours: ppm not established - mg/m3 not established (Threshold Limit Value)
STEL: ppm not established - mg/m3 not established (Short-Term Exposure Limit)

PART B- SUBSTANCE: Hydrogen peroxide.
CAS number: 7722-84-1
ACGIH TWA - OSHA PEL: 1ppm – 1.5 mg/m3

8.2 EXPOSURE CONTROLS

Eye protection / face:	Wear eye protection (face shield or safety glasses needs).
-------------------------------	--

Skin protection:	Use clothes for protection (long sleeve shirt, long pants, shoes and socks)
Hand protection:	Wear resistant gloves when using chemical products resistant (butyl rubber, nitrile and neoprene, polyethylene, polyvinyl chloride).
Respiratory protection:	Atmospheric levels should be maintained below the exposure limits listed in section 8.1. If ventilation is not sufficient to effectively prevent buildup of aerosols or vapors, use approved full face piece air-purifying respirator. Do not use a mask containing oxidizable elements
Local exhaust:	Provide local exhaust, normal dilution ventilation is acceptable. Refer to Industrial Ventilation by ACGIH for a manual of recommended practices.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES	
APPEARANCE:	Light yellowish clear liquid
ODOR:	Soap
COLOR:	Light yellowish
EVAPORATION RATE:	1 (water= 1)
INFLAMMABILITY:	Not flammable
VAPOR PRESSURE:	Unknown
SOLUBILITY IN WATER:	Complete
DENSITY:	1.06
CONCENTRATE pH:	9.8
BOILING POINT:	100 °C (212°F)
EXPLOSIVE PROPERTIES:	No risk of explosion
OXIDIZING PROPERTIES:	Non-oxidising

SECTION 10: STABILITY AND REACTIVITY		
10.1 REACTIVITY:		
There is no known risk of reactivity.		
10.2 CHEMICAL STABILITY:		
The product is stable. No known hazardous reactions.		
10.3 POSSIBILITY OF HAZARDOUS REACTIONS:		
Date of Document: 03/2021	SECURITY DATA SHEET 2021/USA	Page 4 of 8

There is no risk of polymerization.

10.4 CONDITIONS TO AVOID:

Keep away from food and beverages, including those for animals.
Store in a dry place. The storage temperature can be between -21°F / -6°C and +71°C / +160°F. The optimum storage temperature is between 50° F / 10° C and 119° F / 48° C.

10.5 INCOMPATIBLE MATERIALS:

Anionic materials, heavy metal ions, alkaline and combustible materials.

10.6 HAZARDOUS DECOMPOSITION PRODUCTS:

The oxygen that sustains combustion. In case of fire, thermal decomposition can release nitrogen oxides, ammonia vapor and carbon dioxide.

SECTION 11: TOXICOLOGIC INFORMATION

Acute oral toxicity	Harmful if swallowed. High likelihood of mucosal lesions.
Acute inhalation toxicity	Harmful if inhaled. Shortness of breath.
Skin Irritation	May cause skin irritation.
Eye irritation	May cause severe eye irritation
Carcinogenicity:	This product is not listed in IARC Monographs, the NTP 6th Annual Report on the current SCGIC TLV's as a carcinogen or potential carcinogen.

SECTION 12: ECOLOGICAL INFORMATION

12.1 TOXICITY:	Information not available
12.2 PERSISTENCES AND DEGRADABILITY:	Information not available
12.3 POTENTIAL OF BIOACCUMULATION:	Information not available
12.4 MOBILITY IN FLOOR:	Information not available
12.5 RESULTS OF PBT AND VPVB:	Information not available
12.6 OTHER ADVERSE EFFECTS:	Information not available
12.7 OTHER INFORMATION:	Ecological data are not available. Avoid product spills into drains, floor or watercourses.

SECTION 13: DISPOSAL CONSIDERATIONS	
13.1 METHODS FOR WASTE TREATMENT	
DISPOSAL OF WASTE PRODUCT.	Do not discharge into drains or waterways. To not pollute the ground, avoid release to the environment. Immediately after emptying the contents, rinse three times or pressure rinse (or equivalent). The triple rinsing should be done as follows. Empty the remaining contents of container and drain for 10 seconds. Fill a quarter of the container with water container. Shake for 10 seconds. Pour into a water tank for later disposal wiped. Let drain for 10 seconds. Repeat two or more times. The elimination of waste is under the owner responsibility. Given the small rate of substance concentration the product is not considered dangerous. Dispose contents properly according to local regulations.
CONTAMINATED CONTAINER DISPOSAL	Do not reuse or refill container. Save the container label. Contaminated packaging can be eliminated as non-hazardous waste under the full responsibility of the owner of the waste. Dispose of packaging properly with local, state, national and federal environmental control regulations. Nomenclature: 01 15 02 plastic packaging waste.
LOCAL PROVISIONS.	Remove material or dispose in accordance with all applicable federal, state, national and local regulations

SECTION 14: TRANSPORT INFORMATION.	
OTHER RELEVANT INFORMATION:	The product is not classified as hazardous for any mode of transportation. You do not need any special handling procedure. The product is non-hazardous under DOT and IATA Regulations.

SECTION 15: REGULATORY INFORMATION.	
This material at <8% concentration is not listed under SARA, CERCLA or TSCA. According to HMIS it is 0 (zero) for health, flammability and physical hazard, however under PPE it is classified with an 'H' which means safety goggle, gloves and apron is recommended for handling	

SECTION 16: OTHER INFORMATION	
COMPLETE LIST OF USES	Antibacterial Virucide Fungicide Yeasticidal Algaecide Disinfectant Cleaner Deodorizer

The product is designed specifically as a general cleaner and Restoration for use in homes, hospitals, and commercial facilities. It is formulated to disinfect hard, non-porous, inanimate environmental surfaces such as floors, walls, metal surfaces, stainless steel, porcelain, glazed ceramic tile, plastic surfaces, bathrooms, shower stalls, bathtubs, hard nonporous cabinets, and walls of swimming pools. May be used in the kitchen on non-food contact surfaces. If used on food contact surfaces, rinse with potable water prior to food contact. In addition, this product deodorizes areas that are hard to keep fresh smelling including garbage cans, basements, restrooms, and areas prone to odors caused by microorganisms.

Disinfection: Follow the pre-cleaning instructions above. To disinfect surfaces, apply the mixture and let NeoSan Labs Restoration take effect on the moist surfaces for 10 minutes. No washing is necessary beforehand. The Restoration activity affects Staphylococcus aureus, MRSA Staphylococcus, Staphylococcus Epidermidis, Salmonella enterica, Pseudomonas aeruginosa, Klebsiella Pneumoniae, Proteus mirabilis, Vancomycin-Resistant Enterococcus Faecalis, Enterobacter Aerogenes, Escherichia Coli (O157:H7), ESBL, and Listeria monocytogenes, and meets the requirements for hospital use.

Virucidal activity: Follow the pre-cleaning instructions above. To eliminate viruses on hard, non-porous surfaces, apply the mixture and let the product take effect on the moist surfaces for 10 minutes. This product is virucidal against Influenza type A (including H1N1), Influenza type B and Norovirus (feline calicivirus surrogate).

Fungicidal activity: Follow the pre-cleaning instructions above. NeoSan Labs Restoration has been demonstrated to be fungicidal on mold and mildew. Apply a blended mixture of equal parts Part A and Part B as a spray onto a mold afflicted surface and allow to remain wet with product for 10 minutes. Also, this product controls mold and mildew on porous and hard non-porous surfaces. Reapply as necessary.

Fungistatic activity: Follow the pre-cleaning instructions above. This product prevents the development of mold and mildew on porous and non-porous surfaces. Apply mixed solution of equal parts of NeoSan Labs Restoration Part A and Part B on the surface to be treated until it is completely wet. Leave the surface wet for at least 10 minutes. Air dry.

Deodorizer & Air Freshener: NeoSan Labs Restoration is an effective deodorant for locations infected by pet odors, food putrefaction odors, chemical odors, smells of smoke and all other odors. If you need to apply on textiles, test a small area, prior to spray NeoSan Labs Restoration. Mix equal parts of NeoSan Labs Restoration Part A and Part B and apply to the surface and the air volume until odors are eliminated. Allow the product to act on wet surfaces for at least 10 minutes. Allow the product to air dry.

This SDS may be required by law, but this is not an assertion that the substance is hazardous when used in accordance with proper safety practices and normal handling procedures. Data supplied is for use only in connection with occupational safety and health.

The information contained herein has been compiled from sources considered by NEOSAN LABS Inc. to be dependable and is accurate to the best of the Company's knowledge. No guarantee of accuracy is made. It is the user's responsibility to determine the suitability of this information for the adoption of

necessary safety precautions and disposal considerations. The information relates to the specific materials designated herein and does not relate to the use in combination with any other material or other process. The listed hazard data herein may reflect the hazards related to the formulation as a whole or to individual components at 100% concentration. Therefore, certain warnings and hazard statements contained on this SDS may not be applicable to or included in the package labelling. SARA requires submission of annual reports of release of toxic chemicals that appear in 40 CFR 372. This Information must be included in all SDS's that are copied and distributed for this material. Components present in this product at a level which could require reporting under the statute are: NONE
